Led IM Lighting System Pvt. Ltd Story

Led IM Lighting System Pvt. Ltd is one of the fastest-growing LED light manufacturers in Delhi, the company was Established in 2022 year and our company mainly works for light marketing (sells and manufacturing for the corporate sector). The light installation is external and internal. Doing house wiring, conducting, panel installation as well as industrial wiring. Working on low-voltage cable termination and Grounding (earthing).

With cutting-edge technology, Led IM Lighting System Pvt. Ltd manufactures prime-quality LED luminaires that enhance the lighting experience of your space. Our research team focuses on the innovation, robustness, durability, & serviceability of LED lighting fixtures. Every luminaire designed by us is manufactured to meet global standards. Being the fastest-growing LED lights manufacturer in Delhi NCR, we aim to bring a change in the modern lighting decor industry by providing lighting solutions & services that are eco-friendly and aesthetically vibrant

Vission

"Spreading **Happiness** by **Smart** Application of **Technology**"
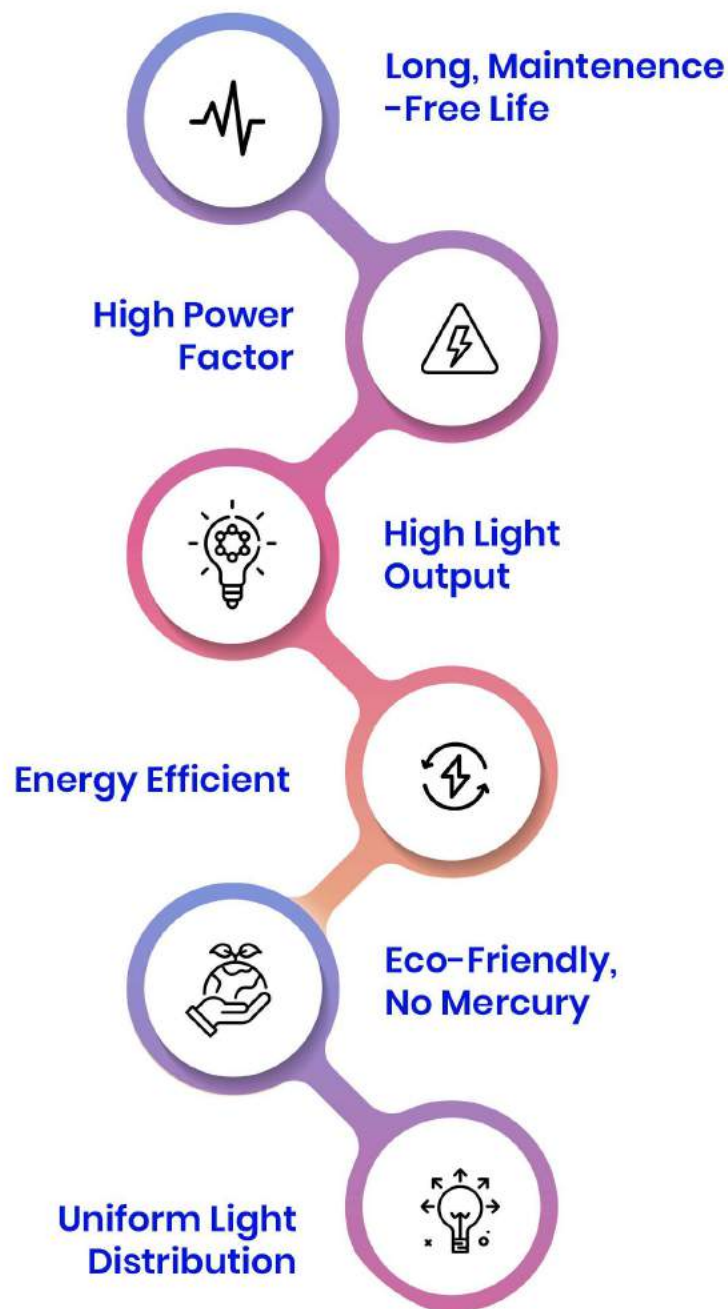

Mission

"We are a leading **Indian electrical brand** with significant global presence. We are focused on making **customers happy** by consistently providing **smart electrical solutions** through **innovation, world-class manufacturing** practices, knowledgeable and customer-oriented **distribution network,** highly responsive **after sales service** and **engaged employees.**"
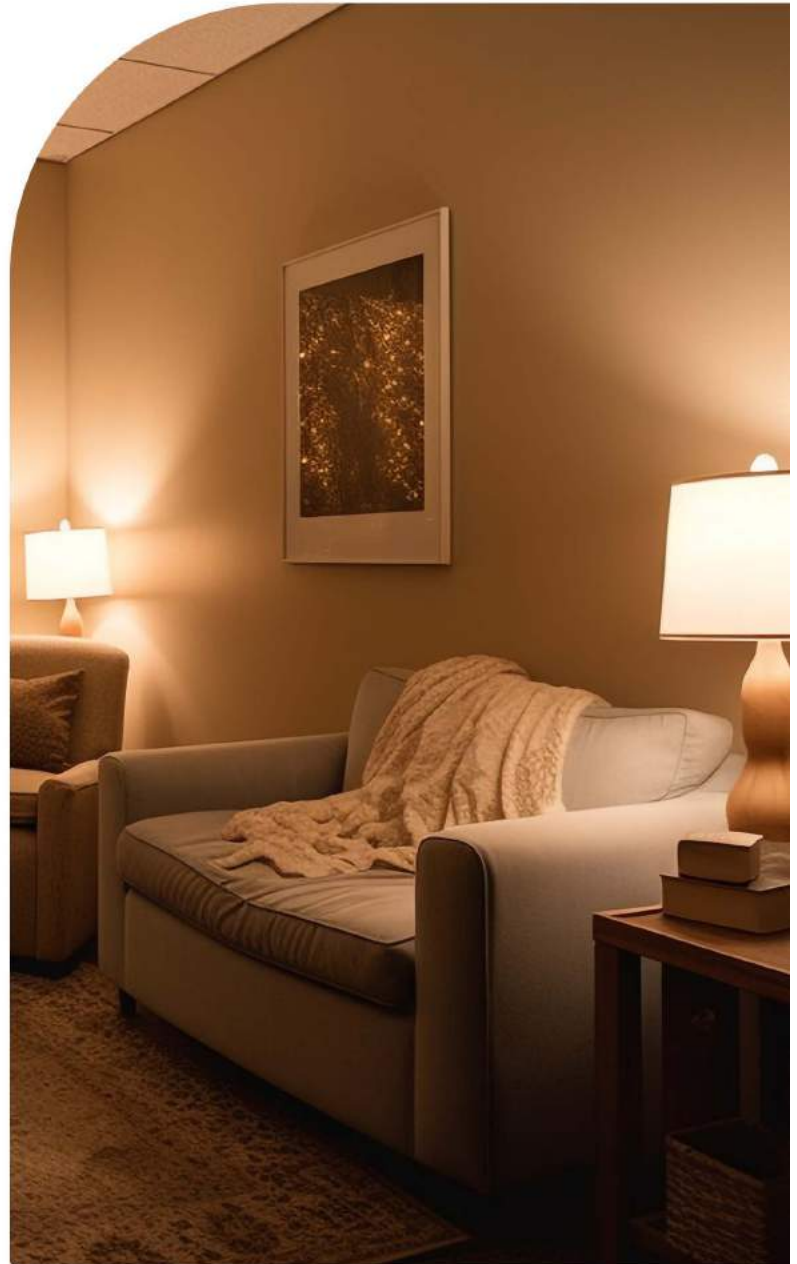

Our Values

Excellence	–	We encourage **practicing empathy** in all our acts
Integrity	–	We **respect** each individual and **value everyone's contribution** in the value chain
Collaboration	–	We care for the need of **individual** and **professional development**
Trust Care	–	We partner in creating a **caring environment**

Salient Features and Benefits of the LED Technology

Long, Maintenence -Free Life

Uniform Light Distribution

What makes our smart lights standout

LED iM
Lighting Privet Limited

SAVE MORE WITH OUR LEDS

Our LED products conserve up to 50% more energy than CFLs. What truly sets us apart from other LEDs, is the fact that our LED products are designed to be more efficient and brighter. All our products available in the market can reach an efficiency rate of up to 120 lm/W.

TESTED TO LAST LONGER

Before our products hit the market, every LED is tested for well over 50,000 hours, which is their normal lifespan. In comparison, normal LEDs have a lifespan of 1,000 to 10,000 hours.

BUILT WITH SUPERIOR ENGINEERING

The heat produced from an LED is most often what affects their lifespan since they are sensitive to temperature. To resolve this problem, Our LEDs feature a Heat Sink Mechanism to dissipate heat. They are scientifically designed with pressure die-cast or extruded aluminum, which allows for better cooling. This makes our LEDs work across temperatures ranging from -20°C to +50°C.

DESIGNED WITH HIGH-QUALITY OPTICS

We uses high-quality, non-yellowing diffusers to ensure a glare-free environment with uniform light distribution, and minimum light loss. Normal LEDs available in the market, feature low-quality diffusers that are prone to turning yellow with time, causing strain on the eye.

DESIGNED TO OUTLAST

In an LED system, the weakest link is the driver (an electrical device that regulates the power of an LED). Our LEDs are engineered with robust drivers that are designed keeping in mind the state of unreliable electrical grids. Our drivers offer a wide operating voltage range of 100-240 VAC and have inbuilt protection like surge protection, short circuit, and overload protection.

A PRODUCT FOR EVERY SPACE

Our LED products conserve up to 50% more energy than CFLs. What truly sets us apart from other LEDs, is the fact that our LED products are designed to be more efficient and brighter. All our products available in the market can reach an efficiency rate of up to 120 lm/W.

COLOUR UNIFORMITY

During production, each LED has its own unique colour, brightness and voltage levels, which leads to colour inconsistency across LED products if they are made directly with these LEDs. However, our LEDs are segregated according to colour to ensure colour uniformity across all our products.

ECO FRIENDLY

Our LEDs contain no harmful chemicals like mercury, which can be hazardous when leaked into the environment while being discarded. Unlike most LEDs, our LEDs emit almost no UV and IR radiations, which can harm sensitive materials and surfaces like goods and artwork.

CUSTOMISED LIGHTING SOLUTIONS

Our team of dedicated Wipro Lighting Design experts is always available to provide creative lighting design solutions for your home for free. Our solutions give you the flexibility to create different light settings as per your requirements. This not only enhances the ambiance but also saves a lot of energy.

WE PROMISE

We reflect innovation and technology. Every service and product we manufacture is checked thoroughly to ensure that we only deliver the highest quality of goods.

CABINET LIGHT SERIES

As its name suggests, under cabinet lighting refers to lights that are installed under a cabinet, resulting in illumination of the area immediately below a row or section of cabinets. Under cabinet lighting has several distinct advantages. First, under-cabinet lighting is resourceful - rather than needing to install an entire lamp fixture or ceiling fixture, under-cabinet lights can be installed directly into a cabinet that is already fixed into place. As a result, under-cabinet lighting can be very cost-effective, especially when considering the total cost of materials.

BEDSIDE LAMP SERLES

Unlike traditional designs, this second generation lamp uses advanced inversion molding and an auxiliary heat dissipation design to let the light emanate from the full body of the lamp. Fill the whole room with soft light to create a nice, warm atmosphere or just to light up the room for everyday use.

COB READING LIGHT

A COB LED (or chip-on-board LED) is a single device with many LED chips mounted on a thermally efficient substrate placed below a uniform phosphor coating. Anyone who walks through a store or home with recessed or track lighting likely experiences light from a chip-on-board LED (COB).

PRIME SPOT
HANGING LIGHT

Prime spot hanging light often called pendant light, sometimes called a drop or suspender, is a lone light fixture that hangs from the ceiling usually suspended by a cord, chain, or metal rod. Pendant lights are often used in multiples, hung in a straight line over kitchen countertops and dinette sets or sometimes in bathrooms.

LED Lighting Service

We are currently manufacturing and servicing a wide range of LED products starting from Led panels, led tube lights, high bay lights etc, for commercial and industrial use. Our products quality and technical specification are at par with the top brands available in India.

Lighting Supply

We have been supling LED Industrial and Commercial Lighting for 5+ years. From the latest LED products to older lighting technologies, as well as bulbs, ballasts, drivers, electrical accessories, tools and more, we offers more than 300 products, a huge inventory of in-stock items and over a hundred brand names.

Marketing

We are a leading LED Manufacturing and Maketing company in India LED products to older lighting technologies, as well as bulbs, ballasts, drivers, electrical accessories, tools and more.

Manufacturing and Repairing

We are one of the leading brand name in the area of manufacturer & repairing the led lights all over india. For the diverse requirements of our valued clients, we are Manufacturing an impeccable range of LED Solar street light, Street Light, Flood Light, Bay Light and many more.t

Light Installation

However, installing a light is no small task. The project requires working with electricity, which can be hazardous. A licensed electrician can install your new lighting, whether you're simply replacing or running power to a whole new site. We knows how to install a light correctly and quickly according to the need.

LED Lighting Service

Electrical Wiring

When it comes to electrical work, experience is crucial. Hiring a contractor who is inexperienced can lead to hazardous complications and an unsafe building. The electrical systems for your home and office are vastly different, and they require an electrician who has had hands-on experience. We have a team of experienced technician how can done the work perfectly.

Low Voltage Cabling

Low-voltage cabling is electrical wiring and trim that requires less current to power infrastructural technologies such as phones, security wires, fire alarms, intercoms, internet, etc. WeWith low-voltage cabling solutions from us, you don't just get equipment plugged in for you. You get a structured cabling partner that keeps your business operating, both now and in the future.

MS & PVC Conducting

PVC Conduit Pipe is simply a wire ducting tube with fire-retardant and low-smoke properties. Our decades of experience with the product clearly sets us apart from other conduit pipe manufacturers in terms of both product quality and price. If you're looking for a surface wire ducting solution, check out Pressfit's

Panel Installation

We are rendering LED Panel Light Installation Service. Owing to their stress-free completion and timely completion, our services are immensely admired by our patrons. In this service, we do different types of printing in proficient way.

LED Lighting Service

Fitter Piller, Pole Light Installation.

We are one of the well-established service providers of Fitter piller and pole light installation Service providers. The offered service comprises of the installation and erection of electrical poles, for laying lighting network. Our offered service is available at minimal price plan and rates.
